

HCSC provided a grant to Centering Healthcare Institute (CHI) to expand access to an evidence based, group prenatal care service delivery model, CenteringPregnancy. This model has been shown to improve maternal and infant birth outcomes.

Process Measures examples:

- Total Groups Started
- Total Patients enrolled
- Average number of groups started/# of patients
- Average number of patients attended/participants
- Payer Mix

- Geographic Setting; Urban/rural/subur
- Patient info Ethnicity; Race,linguistics
- Patient drop out rates and reason
- Overall Provider Satisfaction
- Model delivery inperson, virtual,hybrid

Outcome Measures examples:

- Rate of preterm birth
- Rate of low birth weight
- Rate of breastfeeding at hosp discharge
- Rate of postpartum visit attendance
- Rate of NICU admissions

- Post-partum depression and violence screen
- Rate of delivery type
- Rate of high risk medical (HTN, Gest Diab)
- Rate of high risk behavior (substance abuse, smoking, etc)
